

Join The Band

Cliff Richard

Well if you're back is strong and sturdy
And you can lend a helping hand
And if you want to play our brand of music
Brother won't you join the band

Every man and every woman
Everybody in the land
If you're looking for sweet satisfaction
Come along and join the band

If you think there is room for improvement
You've gotta get into the movement

La la la la

You may not believe in magic
But you've got to understand
You can help us make some magic happen
If you come and join the band

If you think it's time for action
Then it's time you made a stand
We can make it all work out together
So brother come and join the band

If you think there is room for improvement
You've gotta get into the movement

La la la la

If you think there is room for improvement
You've gotta get into the movement

La la la la
