

# Slow Down

Cliff Richard

Slow down, slow down  
This is a sea, swimming forever  
This is the night we dreamed about whenever we were lonely  
So how do we stop and make the moment last

At the stern, the diamonds of heaven  
Take a deep breath and know that  
We've been given something precious  
That will miss us if we move too fast  
So slow down, just slow down

There's a world in every kiss  
That we'd be fools to miss  
So take the time for tenderness and slow down  
This night belongs to us  
We've been running long enough  
The only way to love is to slow down

This is a dance, let's take it slowly  
Love's meant to be a secret  
So mysterious and holy  
So let's take a thousand years to understand  
And let's slow down, slow down

There's a world in every kiss  
That we'd be fools to miss  
So take the time for tenderness and slow down  
This night belongs to us  
We've been running long enough  
The only way to love is to slow down

There's a world in every kiss  
That we'd be fools to miss  
So take the time for tenderness and slow down  
This night belongs to us  
We've been running long enough  
The only way to love is to slow down  
You've got to slow down, slow down

We've got all of the time in the world, baby  
Slow down  
Come on and slow down  
Slow down
