

Nothing But Starlight

Climax Blues Band

I see a place, it's so full of sorrow
I see your faces worried 'bout tomorrow
So many people crying, so many people fighting
Lord, I need someone to see me through another night

It was such a bad day, but you just made it fade away
And tonight I see nothing but starlight
Tonight I see nothing but starlight
This was no place for me, but the moment you came into view
Suddenly I could see nothing but starlight and you

Suddenly this isn't such a bad place
You and me, girl, smiling through the rat race
We don't have to worry, we don't have to hurry
We can laugh at it all, 'til they give the last call

Forget about your sorrows, forget about tomorrow
'Cause tonight I see nothing but starlight
Tonight I see nothing but starlight
This was no place for me but the moment you came into view
Suddenly I could see nothing but starlight and you
Suddenly I could see nothing but starlight and you

Nothing but starlight and you
Nothing but starlight and you
Nothing but starlight and you
