

Standing By a River

Climax Blues Band

All around the world there's people trying to stay alive
They're fighting and they're starving in the struggle to survive

Politicians preaching war right down to history
The only thing they really teach is pain and misery

Cause we're standing by a river
And the river's deep and wide
We've got to get together before we reach the other side

Uhh, I would be so surprised
If they put the people right now
I would be overjoyed

Uhh, I would be so surprised
If they put the people right now
I would be overjoyed

Progress is the password you can hear it every day
What happened of the innocent that are standing in the way
Tomorrow is a question mark and now we can't avoid
So wiggle out just where you stand before the world's destroyed

Cause we're standing by a river
And the river's deep and wide
We've got to get together before we reach the other side

Uhh, I would be so surprised
If they put the people right now
I would be overjoyed

Uhh, I would be so surprised
If they put the people right now
I would be overjoyed
