

In This Together

Clint Lowery

I know I'm wrong and that's ok
I don't appreciate the blame
I'll run away if I want to
The devil put us in our place
But god forbid we try to change
With every step I feel the shadow

Don't tread or lose your nerve
I'm dressed in black for a funeral
It's my time and I ain't letting go

My god we know, when darkness falls
Our silence feels like a weapon
The sun will die
After all we tried
We're all in this now together

Don't look down and hide your rage
That sweet escape has blown away
All that time we wasted on ourselves
Glory days were they, all that great
There's no point on dragging out the past
If we don't want to change

Don't run away and leave behind your faith
When I still standing here

My god we know, when darkness falls
Our silence feels like a weapon
The sun will die
After all we tried
We're all in this now together

I don't know if I trust your word
I don't know if I've had enough
I think have to carry on
But I've heard enough
Yeah, I've heard enough

My god we know, when darkness falls
Our silence feels like a weapon
The sun will die
After all we tried
We're all in this now together
