

Back For You

CLMD

Coming back for you
Coming back for you
Coming back for you
I'm coming back for you

Tell me, am I on your mind
When you look up at the stars, remember when they were ours
I still think about that night
When our world, it fell apart, 'cause I left us in the dark

I've been counting every mile on this highway, ooh
And with every single one, I wish I'd stay

Oh, I keep on thinking over
The day I let you go but
Still my heart is calling out for you
I know I gave a million reasons
For packing up and leaving
Swear this time I'm coming back for you

Coming back for you
Coming back for you
Coming back for you
I'm coming back for you

Tell me, do you feel the same?
'Cause I remember a time when you climbed the highest heights
Tell me that there's still a space
I go to the moon and back to hold onto what we had

I've been counting every mile on this highway, ooh
And with every single one, I wish I'd stay

Oh, I keep on thinking over
The day I let you go but
Still my heart is calling out for you
I know I gave a million reasons
For packing up and leaving
Swear this time I'm coming back for you

Coming back for you
Coming back for you
Coming back for you
I'm coming back for you

I've been counting every mile on this highway, ooh
And with every single one, I wish I'd stay

Coming back for you
Coming back for you
Coming back for you
I'm coming back for you

Coming back for you
