

Wasn't you the one to say
We can always find a way
What am I supposed to say?
Everything around me, everything changed
Remember what you said that day?
I would never cause you pain
You don't have to fall for my affection

Can't keep my feet on the ground
You always find a way out
What goes around comes around
We should know better

I can't see our house in flames
How I turn numb like novacaine
We don't believe in ghosts and spells
We'll find a way to fight in hell
I hear you callin' me up, I hear you callin' me nuts
I keep pretending like I don't give a fuck
You know it's messin' me up, I'm just not saying how much
I keep pretending like I'm falling out of love

I know I was the one to say
No matter what you do, I stay
Wonder how we got this way
Everything around me, everything changed

Can't keep my feet on the ground
You always find a way out
What goes around comes around
We should know better

I can't see our house in flames
How I turn numb like novacaine
We don't believe in ghosts and spells
We'll find a way to fight in hell
I hear you callin' me up, I hear you callin' me nuts
I keep pretending like I don't give a fuck
You know it's messin' me up, I'm just not saying how much
I keep pretending like I'm falling out of love
