

Days Of Youth

Close Your Eyes

Days go by
And all I feel is distance between you and I
I wish time was on our side like we were younger
'Cause I long to feel that closeness, I need to keep that hunger
But all I see is people giving up and moving on
Society acts like a creative time bomb
'Til the child grows and the dreamer dies
I'm afraid it's just a fact of life

These days of youth won't wait around forever, whoa
(These days of youth, these days of youth)
These days of youth could teach us more than ever
To bring this world together

Better worlds
Can only be created by better versions of ourselves
'Cause our dreams, hopes, schemes
Are fading out of sight it seems
But don't let those feelings pass
Get inspired and find a way to make the feeling last!

These days of youth won't wait around forever, whoa
(These days of youth, these days of youth)
These days of youth could teach us more than ever
To bring this world together

You say, "It's a fact of life
The child grows and the dreamer dies"

You say, you say
"The child grows, the dreamer dies"
Well we say, we say
Time waits for none, so dream on!
Dream on, you dreamer, dream on, dream on!
Dream on, you dreamer, dream on, dream on!
I dream in spite of you
I dream in spite of you
I dream in spite of you
I dream in spite of you

These days of youth won't wait around forever
(These days of youth, these days of youth)
These days of youth won't wait around forever
(These days of youth, these days of youth)

Fuel your drive! Inspire your mind!
