

# Carried Away By Your Voice

Clou

The road was white that night in 95  
As the snow came raining down  
Your story filled the car with waves of laughter  
You turned to me and I could feel the heat  
From my face down to my spine  
While the winter howled and threw its weight around

Although we had a place we had to be  
It was useless now to try  
The storm had turned asphalt to ice  
I hit the volume on the radio  
It hopes to drown away the noise  
And when the chorus hit you sang this melody

Whisper softly in the cold  
I've only you to keep me warm  
Speak to me and give me hope  
Carry me with your voice  
Whisper of the life we'll know  
Together till we're dust and bone  
Speak to me these words of hope  
Carry me with your voice

Long after that night I hoped to keep those dreams alive  
In all my thoughts in every moment  
And when you went away thought I was going to go crazy  
Won't you come home to me again  
Has all the distance made your heart grow  
Colder by the day  
Have your ears become deaf to this melody

Whisper softly in the cold  
I've only you to keep me warm  
Speak to me and give me hope  
Carry me with your voice  
Whisper of the life we'll know  
Together till we're dust and bone  
Speak to me these words of hope  
Carry me with you voice

If there's some clarity to find  
It's locked up deep inside your mind  
While I'm the fool who's holding on  
You say those promises were made  
By children simply passing time  
Believing words heard in a song

A made up life we're never know  
Together till we're dust and bone  
Speaking always words of hope  
Carry me with your voice  
Whisper softly in the cold  
I've nothing now to keep me warm  
Cease your speech I have no hope  
Carried away by your voice  
Carried away by your voice  
Carried away by your voice

Carried away by your voice

Whisper softly in the cold  
Carried away by your voice
