

Find Me In The Water

Cloud Control

Take me away
Take me only for the week
Can you get out of here
Roll out in our car
Wish we were somewhere
Somewhere different
Get this shit that you've been going through
I'll get us out of here

I've been working
You've been working too
There's only so much we can take
So much to put us through
Don't wanna stress you out
Don't wanna get you down
We got to quit this city
We got to quit this city

Find me in the water
The feeling of doubt
We can work this out
In the water
The feeling of doubt
We can work this out
Find me in the water
The feeling of doubt
We can work this out
In the water
The feeling of doubt
We can work this out

Let's leave this party
There will always be another
Put down the cup
Take time for us if we're gonna be together
Don't have to make it special
Because you're already something
Feel it wash over you
Feel my love and see me running

Find me in the water
Find me in the water

Find me in the water
The feeling of doubt
We can work this out
In the water
The feeling of doubt
We can work this out
Find me in the water
The feeling of doubt
We can work this out
In the water
The feeling of doubt
We can work this out

That shit that you've been going through

Find me in the water

The feeling of doubt

(Wash away, wash away, wash away...)

(We can work, we can work, we can work...)
