

## Step Forward

Cloud Cult

When your life is finished burning down  
You'll be all that's left standing there  
You'll become a baby cumulus  
And fly up to the firmament  
And no one gets to know the purpose  
We need to learn to live without knowing  
But all we are saying  
Is step forward, step forward

We can only see a small part of everything and nothing  
When you finally know you can't know  
Step forward, step forward  
And if you don't believe in miracles  
It comes with every single heartbeat

Another opportunity  
Step forward, step forward

And everybody here is trying so hard  
To make things a little better  
I never got a chance to thank you  
Step forward, step forward  
And everybody here is trying so hard  
To make things a little better  
All we are saying is step forward, step forward

When your life is finished burning down  
You'll be all that's left standing there  
You'll become a baby cumulus  
And fly up to the firmament
