

# Open Rain

Cloud Nothings

I've been hearing all about you lately  
All everywhere I look right there you are  
And now I wanna know if you can save me  
Like the way you did the others from afar

So through the open rain  
I waited here for days  
I couldn't see your power  
But I could hear my name  
And you said the word to me  
And I could not believe  
Walked into my [?]

And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you

It's hard to be without you every morning  
Oh it's hard to see you loving who you are  
But I just wanna know how you have made me  
See another side of who we are

So through the open rain  
I waited here for days  
I couldn't see your power  
But I could hear my name  
And you said the word to me  
And I could not believe  
Walked into my [?]

And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you  
I do

And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you  
And I want to know it's true  
And I want to see with you
