

The Room It Was

Cloud Nothings

I got these names I'm hanging onto like I made them
When I keep calm when everything's just what I'm feeling
Well these words aren't changing anything at all
And this room is not the room it was before

Anyway you know I feel you but I won't go down
I feel you but I won't go down
I feel you but I won't go down
Fighting over every line with you

I see life end everywhere I walk
And I've traveled so many bodies far
But I can't be anything at all
This room is not the room it was before

Anyway you know I feel you but I won't go down
I feel you but I won't go down
I feel you but I won't go down
Fighting over every line
I feel you but I won't go down
I feel you but I won't go down
I feel you but I won't go down
Fighting over every line with you

The shadow
The shadow I remember
The shadow
The shadow I remember
