

Care

CLOVES

Caught you on your way back home
Every little fears nothing new to cheer me on
I'm running all my favourite wrongs
Every little fears nothing new to cheer me on

It's all lies and your way to late
Sunrise and you're way too late

I thought you care
You know that nothings ever coming for free
I thought you care
You know that nothings ever coming for free

Whatever you think I need
Make it be the best tell me what you guarantee
Caution never heard me leave
So take it like test, better that you just don't speak

All lies and your way to late
Sunrise and you're way too late

I thought you care
You know that nothings ever coming for free
I thought you care
You know that nothings ever coming for free

Caught you on your way back home
Caught you on your way back home
I thought you care
I thought you care
