

Don't You Wait

CLOVES

Do me a favor just keep me near
Don't you remember when you said what I wanted to hear?
I'm not so clever, but I know it's real
If I left without you I don't know if I'd ever heal

Where are we now
You've got me thinkin'
Where are we now

We've fallen further from our love
Don't you wait
Don't you wait

From a distance we stopped trying
Don't you wait
Don't you wait

You could do better I've tried to be clear
I can be your friend, but that's not what you want to hear
I'm not your answer in time you'll see
You have a future where you won't need to love me

I'm leaving now
Gotta keep moving
I'm leaving now

We've fallen further from our love
Don't you wait
Don't you wait

From a distance we stopped trying
Don't you wait
Don't you wait

I could have stayed there but it wouldn't be fair to you
I could have faked it but I couldn't see it through
We didn't make it, it's better to start new

We've fallen further from our love
Don't you wait
Don't you wait

From a distance we stopped trying
Don't you wait
Don't you wait
