

Lonely Night

CNBLUE

You are gonna be my star
Gotta be their super star
And tell 'em you will never change
I can feel the love
But I can't feel your love
You won't never make me feel alive

You are already a star
Gotta be their only star
And tell 'em you be stay the same
I can feel the love
But I can't feel your love
I can never ever fall in love

Gonna be a lonely night
I can't see you really love me
Gonna be a lonely night
I can't trust you all no more
Can't you be my light?
Please, be my light
I not going back to "old me"
Gonna be a lonely night
I can't trust you all no more
You all lie

You are gonna feel alive
You know I will never lie
You can believe what I say
I can feel the love
But I can't feel your love
I can never ever fall in love

You are gonna feel like flying
You are gonna be alright
You be live in neverland
Can you let me breath?
Can you let me dream?
Can you really make me fall in love?

Gonna be a lonely night
I can't see you really love me
Gonna be a lonely night
I can't trust you all no more
Can't you be my light?
Please, be my light
I not going back to "old me"
Gonna be a lonely night
I can't trust you all no more
You all lie

I feel lost
You tell me you feel sorry
I'll be gone soon
Before you take me down

Gonna be a lonely night
I can't see you really love me

Gonna be a lonely night
I can't trust you all no more
Can't you be my light?
Please, be my light
I not going back to "old me"
Gonna be a lonely night
I can't trust you all no more
You all lie
