

Better Days

Cobi

Fields of lavender
Honey straight from the farm
That's the smell and taste
Of summer
Bringing back memories
Skinny dipping
And campfires keeping us warm
Keeping me up
All night long

Blue notes pouring out of me lately
I know better days will come along
I'm alone
With the memories
Of better days
That are gone
And I wonder
Can take it all with a smile?

Fields of lavender
Heaven right in my arms
Good love will take you
Higher
I can't run away
From the heartache and the pain
When yesterday calls
But I can love the right way
Everyday

Blue notes pouring out of me lately
I know better days will come along
I'm alone
With the memories
Of better days
That are gone
And I wonder
Can take it all with a smile?

Ow
Hit me
Better days come along
You know they come along with love

Blue notes pouring out of me lately
I know better days will come along
I'm alone
With the memories
Of better days
That are gone
And I wonder
Can take it all with a smile?

Better days come along
You know they come along with love
