

Burnin' One Down

Cobi

Oh my
They say
We're going to war
Get on board
The TV is on
Can't look away
Nobody seeing things the same way
The temperature is rising
More people to fear
Believe what they seeing
Believe what they hear
But I can't
See why
So many shot down in their prime

They put on their boots and load up their guns
You're getting yours too, better put your mask on
But I'll be right here singing my song
Burnin' one down, ready when they come around
Put on their boots and load up their guns
You're getting yours too, better put your mask on
But I'll be right here singing my song
Burnin' one down, ready when they come around

Oh my
These days
Surviving the storm
Stay at home
It's gonna flood
A hurricane
Be ready get down and take aim
The image of violence
Is deep in the mind
In need of some guidance
For leading the blind
But I can't
See why
So many shot down in their prime

They put on their boots and load up their guns
You're getting yours too, better put your mask on
But I'll be right here singing my song
Burnin' one down, ready when they come around
Put on their boots and load up their guns
You're getting yours too, better put your mask on
But I'll be right here singing my song
Burnin' one down, ready when they come around

Who here is gonna save me
Who here is gonna try and lay down my life
Never let 'em take me
When it's bombs away and the sky is falling down
Who here is gonna save me
Who here is gonna try and lay down my life
Never let 'em take me
When it's bombs away and the sky is falling down

Ready when they come around

They put on their boots and load up their guns
You're getting yours too, better put your mask on
But I'll be right here singing my song
Burnin' one down, ready when they come around
Put on their boots and load up their guns
You're getting yours too, better put your mask on
But I'll be right here singing my song
Burnin' one down, ready when they come around
