

Highs & Lows

Cobi

Highs and the lows
Is anybody home
Show me to the road
Nobody knows
Lies over told
Light city homes
Eyes cry in smoke
From your highs and your lows
Hiding in a song
Barely holding on
Flying like a stone
When you throw me
Father sold my soul
Mama made me so cold
Time put a weight on me

I should've known
Walked right by you
Lost and alone
I'm just like you
Hide from the law
Do what I do
Find love high and low

I don't want to face the day
Don't want to show my face
I'd just rather fade away
Got nowhere to go

Highs under lows
Eyes look through the phones
Fire from the drones
Rights feel so wrong
If I'm all alone
Then God is just a poem
And stars never were
More than lights in the cold
Cannons from the coast
Fire then reload
Thoughts are fighting wars inside me
Father rest his soul
Mama sees me five years old
And I'm on my knees in deep

I should've known
Walked right by you
Lost and alone
I'm just like you
Hide from the law
Do what I do
Find love high and low
Find love high and low
High and low
Find love high and low
