Pressure

Cobi

People always tell me
There's something wrong with me

They say that I've been living
In my own reality

They're trying to understand me
They really don't know why

I don't even sweat em
I put it all on the line

Always keeping my cool
Under pressure
Always keeping my cool
Under pressure
Under pressure

I know a lot of women
Trying to get up under my skin

They can't seem to figure out
Just where to begin

I think they might've seen me
In David Yurman magazine
Wanna ride the rocket booster
Liquid oxygen and kerosene

Always keeping my cool
Under pressure
Always keeping my cool
Under pressure
Under pressure

Always keeping my cool
Under pressure
Always keeping my cool
Under pressure
Under pressure
