

Doomsday Parade

Cobra Skulls

We're so sorry Africa
The heat is coming after you
Like an angry giant we awoke
How can you prepare?
You cannot if you're not aware

And what's the use of elevation
If it won't precipitate?
Mount Kenya, we're too late
Dance rain, dance Massai
Said, dance before you die!

And wish it didn't matter what country that you're from
One world together or one world come undone
But if we keep repeating the same mistakes we've made
You'll make me a trumpet in a doomsday parade
You make me a trumpet in a doomsday - doomsday parade

You gotta get dressed for the mass migration
Will it be a polar nation?
Where you hope they live and let live
Better hope they're willing to give

And hope that they don't care about the color of your
skin
One world we're losing, one world we've got to win
But if we keep repeating the same mistakes we've made
You'll make me a trumpet in a doomsday parade
You make me a trumpet in a doomsday - doomsday parade

Do you feel like you're watching?
Do you feel like you participate?
And when the good times are over
Do we become one or separate? (Separate)

And keep on fighting for the false gods we praise
While we're all stuck in this terrestrial maze?
And keep repeating the same mistakes we've made
And make me a trumpet in a doomsday parade
And make me a trumpet in a doomsday - doomsday parade
