

Right now the world seems dark and gloomy
You wanna run and hide away
Just take a chance and listen to me...
That heavy cloud is going to fade

Not gonna let 'em steal your sparkle
Ain't gonna let 'em break your heart
I'll find a way to make you smile
They're gonna see who you really are
Underneath the insecurities
Don't you think it's time that you believe

You shine like glitter
You shine like glitter
Always remember
When they try to dim your light
You shine like glitter

Don't be afraid to look in the mirror
You're perfect just the way you are
I know it's hard to see
When your sky's lost all it's stars
Underneath the insecurities
Finally you're starting to believe

You shine like glitter
You shine like glitter
Always remember
When they try to dim your light
You shine like glitter

Don't let 'em dim your light
Don't let 'em steal your shine
Don't let 'em dim your light
Don't let 'em steal your shine

You shine like glitter
You shine like glitter

You shine like glitter
You shine like glitter
Always remember
When they try to dim your light
You shine like glitter
Don't let 'em steal your shine
You shine like glitter
When your sky's lost all it's stars
Always remember
When they try to dim your light
You shine like glitter
