

# World Is Dancing

Coco Jones

The week is done, I'm out of here  
Gotta escape this madness, made it disappear  
It always seems like time is moving slow  
I need to heat the floor, let the speakers blow

Don't think about it now, just let the music play  
Let all the problems go, we'll watch them fade away  
'Cause you're not the only one who's been feeling the heat  
So get up on your feet  
'cause the whole world is dancing  
Yeah, we're young and we're wild and we're crazy  
Live it up, live it up  
The whole world is dancing  
Find a girl, find a guy you can dance with  
Live it up, live it up  
Dancing

From here to every block we feel it just the same  
Rocking and screaming, we're gonna party the night away  
So contagious, no matter who we are  
LA to New York, everybody get off the wall

Don't think about it now, just let the music play  
Let all the problems go, we'll watch them fade away  
'Cause you're not the only one who's been feeling the heat  
So get up on your feet  
'cause the whole world is dancing  
Yeah, we're young and we're wild and we're crazy  
Live it up, live it up  
The whole world is dancing  
Find a girl, find a guy you can dance with  
Live it up, live it up

Now everybody if you wanna go cry, cry, cry  
We turning on the base and the whole party  
I'm pitching home plate when you run my way  
We give the guy old in the house a race  
So we can party hard when it's hard, no tumble  
Forget all of our problems in a humbo  
And rock to the beat like we do this, get it on the floor like this

The whole world is dancing  
Yeah, we're young and we're wild and we're crazy  
Live it up, live it up  
The whole world is dancing  
Find a girl, find a guy you can dance with  
Live it up, live it up  
Dancing, dancing
