

Surf

Cocoon

I just heard the news
A storm is coming and it's taking you
It always strikes too soon
Always strikes too soon

Since there's no way to make you stay
Be in peace we'll be okay
You showed us how to surf the coming wave
And when we're missing you too much
When the wave's too high for us
We'll play some jazz and drink wine instead

Now feel the summer breeze
The setting sun and all there is
Look at the open sky
Look at the open sky

Since there's no way to make you stay
Be in peace we'll be okay
You showed us how to surf the coming wave
And when we're missing you too much
When the wave's too high for us
We'll play some jazz and drink wine instead

Since there's no way to make you stay
Since there's no way to make you stay
Since there's no way to make you stay
Be in peace we'll be okay

'Cause you showed us how to surf the coming wave
And when we're missing you too much
When the wave's too high for us
We'll play some jazz and drink wine instead
