

Give Me Something

Cody Fry

There's a hollow in my bed
Halo missin' from your head
Am I alright?
Are you?

Give me something I can do
Tell me something true
Before I break my heart all over you
Give me something to believe
Air that I can breathe
I'm trying to find the faith inside of me
Just give me something
Just give me something

Laughin' burns like paper would
Things I said begin to turn
And coil and twist, they hiss
How could you? (woah-oh)

Give me something I can do
Tell me something true
Before I break my heart all over you
Give me something to believe
Air that I can breathe
I'm trying to find the faith inside of me
Just give me something
Just give me something (oh)
Just give me something
Just give me something

There's a hollow in my bed

Give me something I can do
Tell me something true
Before I break my heart all over you
Give me something to believe
Air that I can breathe
I'm trying to find the faith inside of me
Just give me something
