

Thinking About You

Cody Fry

It's like I'm living on a cloud
Out here just floating around
I've got a tendency to move too fast
Even when I know I'm walking on glass
Someone better hold me back

Slow down slow down slow down slow down
But I just gotta
Know now know now know now know now
You got it, all right
Yeah, I'd say you got it, all right
You got me staying up all night

I'm still thinking about you
I'm still thinking about you, you
Can't stop thinking about you
I'm still thinking about, thinking about you

I got my headphones on
No sound just walking along
So many questions running through my mind
Don't even care if I'm just wasting my time
Nobody's gonna hold me back now

Slow down slow down slow down slow down
But I just gotta
Know now know now know now know now
You got it, all right
Yeah, I'd say you got it, all right
You got me staying up all night

I'm still thinking about you
I'm still thinking about you, you
Can't stop thinking about you
I'm still thinking about, thinking about you

I think I'm losing my mind
Yeah I think I'm losing my mind
Why does this happen every time?

I'm still thinking about you
I'm still thinking about you, you
Can't stop thinking about you
I'm still thinking about, thinking about you
