No Time

Cody Jinks

Burning the candle at both ends leaves no time to think
To kill one flame, it's to slow the burn
Hittin' it hard every night when the sun goes down my girl
You know I'm always around, I'm in some other town

I can't say where I'll be come this time next week
I know I won't be here, I know I won't be home
I've lost so much of myself, I wonder now
Am I really what all these people see

I've got no time to think, the time that I've let go
I've got no time to think, the time you've spent alone
I've got no time to think, of the years I know all the times wi
th you how they come and go, got no time to think, the time tha
t I've let go

Ten years gone and I'm on my way to a million miles
You know they don't come free you know they roll by slow
I'd be lyin' if I said that I did not love my work
You know I love you too, now it's time to go

I've got no time to think, the time that I've let go
I've got no time to think, the time you've spent alone
I've got no time to think, of the years I know all the times wi
th you how they come and go, got no time to think, the time tha
t I've let go

I've got no time to think, the time that I've let go
I've got no time to think, the time you've spent alone
I've got no time to think, of the years I know all the times wi
th you how they come and go, got no time to think, the time tha
t I've let go

Burning the candle at both ends leaves no time to think
To kill one flame, will slow the burn
