Noise

Cody Johnson

I can hear those trucks on the highway tonight
I can hear those kids down the block playin' ball
I can hear the drone of my boss in my head
Sayin' "This weekend I need you on call"
The volume's up, the pressure's on, the phone is buzzin'
You're the only reason that I don't go crazy

'Cause when we kiss, the world outside is gone
And whatever lonely there is moves on
My heart doesn't have any choice
When I hear my name on your voice
Everything else, everything else is just noise

Your eyes cut through every distraction
Through the rage of the machine and the roar of the engines
This rock keeps turning, this city don't sleep
You're my secret shelter when I can't find peace
The way you touch, the way you whisper
Way you love and how it lingers
You can make it all go away

'Cause when we kiss, the world outside is gone
And whatever lonely there is moves on
My heart doesn't have any choice
When I hear my name on your voice
Everything else, everything else is just noise

'Cause when we kiss, the world outside is gone
And whatever lonely there is moves on
My heart doesn't have any choice
When I hear my name on your voice
Everything else, everything else is just noise
Everything else is just noise
