Work Boots

Cody Johnson

You ain't got no problem gettin' up with the sun
Scuffing up leather, diggin' in the red dirt, gettin' that job done
But it's Friday night and you're tappin' right along with the g roove
And that pretty little thing is lookin' at me, I'm countin' on you

So come on work boots
We've got a little work to do
It looks like she wants to dance
I wouldn't wanna miss our chance

She might be the one to change our world
But we ain't gonna get the girl, sittin' on a stool
We gotta make our move, so come on work boots

First step is we'll go up and ask her her name
And then maybe these two left feet will get two-
step carried away
Don't dig your heels in now just follow my lead
It's a moment of truth and I can't have you draggin' our feet

So come on work boots
We've got a little work to do
It looks like she wants to dance
I wouldn't wanna to miss our chance

She might be the one to change our world
But we ain't gonna get the girl, sittin' on a stool
We gotta make our move, so come on work boots

Hell this might just be our song
Get to work, boots
Who knows maybe later on
I might get to kick you off

She might be the one to change our world
But we ain't gonna get the girl, sittin' on a stool
We gotta make our move, so come on work boots
