Everything You Need

Cody Simpson

When you want out, but you're stuck in
When people leave, that you thought were friends
When no one gets, the mood you're in

When you're at a party so you hold the drink
But when no one's looking, pour it down the sink
Cause everyone judges but no one thinks

But you
Got everything you need to make it through
And you
Got everything so go and make some moves
But can't you see
That you got me
You got everything you, everything you need

When everyone laughs, so you do too
When everyone dances, but you got no moves
When you wish that you could just do you

When you go outside and put on your disguise
Cause you can't find nothing in anyone's eyes
And you hate the music and everyone lies

But you
Got everything you need to make it through
And you
Got everything so go and make some moves
But can't you see
That you got me
You got everything you, everything you need
