

# Shine Supernova

Cody Simpson

Flying through the galaxy with Supernova energy  
Under pressure, together  
We're so much better  
So much better you know  
And if a shooting star cross the sky tonight  
We'd be super heroes winning every fight  
Side by side  
We come alive  
Standing on your shoulders I can touch the sky

Out of the darkness  
Blazing  
You know how we made it  
Burning bright as the sun is fading  
Shine  
Shine  
Shine  
and we  
Shine  
Shine  
Shine

Just like a supernova  
Burns so amazing  
We fly high and watch how  
You make me  
Shine  
Shine  
Shine  
and we  
Shine  
Shine  
Shine  
Together we shine

Force field made of you and me  
Nothing can stop this energy  
Together  
Forever  
We're so much better  
So much better you know

Breaking through reality  
We're soaring to infinity  
There's no measure, wherever  
We fly together  
Defying gravity  
And if a shooting star cross the sky tonight  
and every planet in the universe align  
Side by side  
We come alive  
Standing on your shoulders I can touch the sky

Out of the darkness  
Blazing  
You know how we made it  
Burning bright as the sun is fading

Shine  
Shine  
Shine  
and we  
Shine  
Shine  
Shine

Just like a supernova  
Burns so amazing  
We fly high and watch how  
You make me  
Shine (together we shine)  
Shine  
Shine  
Shine (together we shine)  
Shine  
Shine  
Together we shine  
Together we shine  
Supernova baby

Oh yeah

Together we shine
