

I Don't Want to Break Your Heart

Cœur de Pirate

Those street lights are changing as new waves of sorrow enter the night
And concrete walls can sing all of the times we raged in fright
Can you face the facts or are you ignoring what we've become?
And I'll walk in silence until I have found what needs to be done

But I don't want to break your heart
It's hard enough that we're apart
All I can say is your name
What we had could not be tamed
And we can fight all we want
The sun is setting on our love
And I can't take another lie
So for now, I'll say goodbye
I'll say goodbye

I can recall all of the times that I've waited for you
Just give me a sign that you want to hear what we are going through
And those walls keep our secrets and they're ignoring what we've become
Just walk out in silence I think we've found what needs to be done

But I don't want to break your heart
It's hard enough that we're apart
All I can say is your name
What we had could not be tamed
And we can fight all we want
The sun is setting on our love
And I can't take another lie
So for now, I'll say goodbye
I'll say goodbye

I told my bae it's her life
And she the freshest for getting me
Told her goodbye, because this ride could get dirty, yea
I couldn't lie I keep my message like 3rd degree
Burn you inside, ain't wanna fire my lady, yea
Wait till I'm 88 then I'll have the key
Thinkin' back on my shorty, and realize it's for me
I leave the date then I radiate, I'm young and I'm free
Thinkin' back can't be sorry, I love you best when I leave
Aw, boo

But I don't want to break your heart
It's hard enough that we're apart
All I can say is your name
What we had could not be tamed
And we can fight all we want
The sun is setting on our love
And I can't take another lie
So for now...

But I don't want to break your heart
It's hard enough that we're apart
All I can say is your name
What we had could not be tamed
And we can fight all we want
The sun is setting on our love
And I can't take another lie

So for now, I'll say goodbye
I'll say goodbye
Just say goodbye
Oh, just say goodbye
