

## A Friend To Enemies

Coheed and Cambria

Desert boy, you made your wish  
Now wait and see  
All alone in this wide world  
Afraid, but don't be  
You sure found an easy way  
To those city streets  
Oh, they're yours, patience and time  
A love you will find

Broken king, you gave your rule  
What a mess you've made  
Through a time, you made us fear  
You scorched this place  
If you could find the will to be  
To walk that line  
Would they love, love you enough  
To keep you up?

So please, tell me your heart's in the right place  
Can you feel it as it beats?  
I care more than these words convey  
A friend to enemies  
Ooh, tell me your heart's in the right place  
Can you feel it as it beats?  
I care more than these words convey  
A friend to enemies

A lesson taught, you learned it well  
You crazy kid  
Applauding all you've given them  
The hurt you mend  
And now you're off to be a man  
It's well deserved  
Oh, all is yours, we'll watch you grow up  
So proud, all you've done

So please, tell me your heart's in the right place  
Can you feel it as it beats?  
I care more than these words convey  
A friend to enemies  
Ooh, tell me your heart's in the right place  
Can you feel it as it beats?  
I care more than these words convey

A friend to enemies  
A friend to enemies  
A friend to enemies
