Crash My Car

Coin

Walk in like a wrecking ball
The way she moves make you miserable
All eyes on the golden girl
She's gonna tell you, gonna tell you, gonna tell you
That you're too sweet
Swan dive to the concrete floor
The pavement never felt so warm
One look and you already know
She's gonna cut you, gonna cut you, gonna cut you
Cut you real deep

Baby, I'm freaking out
Lay it all on me
Anything you want

You can crash my car tonight
Go out wasting all my time and money
I love the way you're breaking my heart
And I can't stand to see you leaving lonely

I'll drive you home at the end of the night
I'll drive you home at the end of the night

Dead last as a drama queen
But I found myself in the front seat of her car
She's bad blood royalty
But that's fine
It's gonna be alright with me

Baby, I'm freaking out
Lay it all on me
Light me up and lay me down and love me like you shouldn't now

You can crash my car tonight
Go out wasting all my time and money
I love the way you're breaking my heart
And I can't stand to see you leaving lonely

I'll drive you home at the end of the night
I'll drive you home at the end of the night

You can crash my car tonight
Go out wasting all my time and money
I love the way you're breaking my heart
I can't stand to see you leaving lonely

Crash my car
Take all my money and run
Baby if that's what you want
(Lonely, lonely)

Crash my car
Take all my money and run
Baby if that's what you want
(Lonely, lonely)
