

Open your eyes
Sometimes it's right when it's wrong
And wrong when it's right
See the different colors in your sky
Sometimes a little sunset can look like a sunrise

I wanna feel what's real
I'm taking a ride to the back of my mind
I wanna taste my tears
I'm living a life, but something isn't working out

Open your mind
It's better trying to move on than trying to rewind
Waterfalls of color from your eyes
Sometimes a little heartbreak can look like a sunrise, but

I wanna feel what's real
I'm taking a ride to the back of my mind
I wanna taste my tears
I'm living a life, but something isn't working out (Something i
sn't working out)
Something isn't working out (Something isn't working out)
Something isn't working

Time is always on your side
Time is always on your side
Time is always on your side
Time is always on your side

I wanna feel what's real
I'm taking a ride to the back of my mind
I wanna taste my tears
I'm living a life, but something isn't working out (Something i
sn't working out)
Something isn't working out (Something isn't working out)
Something isn't working out (Something isn't working out)
Something isn't working out (Something isn't working out)
Something isn't working
