

I Got The Key

Colby O'Donis

We're sitting here just me and you
Why should I wait to make a move
Cus something's gotta give tonight
Girl I only wanna satisfy
Tonight's the night we lose control
No more distractions let it all fold
Go on let nature take it's course
Everything is gonna be alright (oh girl)

I wanna be with you so much that we can do
Just open your heart and see (got some stuff for you)
If you wanna know what I'm about
There's only one way to find out
You know what I'm talking about
Girl I got the key

Tell me your secrets I'll tell you mine
We'll take it slow one thing at a time
You ain't gotta worry baby cus I only wanna be your man
So what's the dea... l girl let me know
Don't wanna stop... been here before
We've come too far to turn back now
Don't try to stop the inevitable

I wanna be with you so much that we can do
Just open your heart and see (got some stuff for you)
If you wanna know what I'm about
There's only one way to find out
You know what I'm talking about
Girl I got the key

Girl I got the key (to your heart)
You should be with me (you should be with me ooooooh)
Girl I got the key (I got the key I wanna... I wanna do you right)
You should be with me (I don't wanna wait so let me in...)

I wanna be with you so much that we can do
Just open your heart and see (got some stuff for you)
If you wanna know what I'm about
There's only one way to find out
You know what I'm talking about
Girl I got the key...
