

# In This Cold

## Cold Driven

It's killing me to see you dead inside  
Nothing in this place can sound alive  
It's killing me to watch you breaking down  
I'm slowly falling to pieces now  
Night after night  
Will we survive?  
Night after night  
Are we dead in this cold? Oh!

Everything's numb  
Everything breaks  
Everything will die  
In this cold  
In this cold

I'm afraid to face the pain in your vacant eyes  
When you're staring back at me I realize  
I'm afraid of everything that you become  
Now I'm starting to come on tone  
Night after night  
Will we survive?  
Night after night  
Are we dead in this cold? Oh!

Everything's numb  
Everything breaks  
Everything will die  
In this cold  
Everything's real  
Every mistake  
Everyone will die  
In this cold  
In this cold

Are you gonna give up?  
Are you gonna keep breaking down?  
Are you gonna give up?  
Are you gonna keep breaking down?  
Are you gonna give up?  
Are you gonna keep breaking down?  
Are you gonna give up?  
Are you gonna keep breaking?!  
Are you gonna keep breaking?!  
Are we dead in this cold? Oh!

Everything's numb  
Everything breaks  
Everything will die  
In this cold  
Everything's real  
Every mistake  
Everyone will die

In this cold  
In this cold  
In this cold

In this cold  
In this cold
