

Straight For Disaster

Cold Driven

Going over
We're going overboard
Sinking so low
Sinking we're sinking
And if we're going down
I will see you in hell
And if we're going down
The tide will take me

You keep pulling me under
You try to drag me down
Over and over
The tide will take me
The waves keep crashing on me
And I can feel it getting harder to breathe
It's like we're always getting carried away
And I know we're heading straight for disaster

Death grips tightly
Caught in the undertow
Drowning so slow
Drowning we're drowning
And if we're going down
I will see you in hell
And if we're going down
The tide will take me

You keep pulling me under
You try to drag me down
Over and over
The tide will take me
The waves keep crashing on me
And I can feel it getting harder to breathe
It's like we're always getting carried away
And I know we're heading straight for disaster

You keep pulling me under
You try to drag me down
Over and over
The tide will take me
You keep pulling me under
You try to drag me down
Over and over
The tide will take me
The tide will take me

The waves keep crashing on me
And I can feel it getting harder to breathe
It's like we're always getting carried away
And I know we're heading straight for disaster
We're heading straight for disaster
