We Carry On

Cold Driven

I'm going through the phases
Putting my feelings in their places
For now I'll feel the pain
Holding on to disbelief

The thought just won't sink in
I will never see you again
I need to know that sometimes
You're with me every step
I watch the footprints that you left
They're meant for looking back

I'll carry on
As I ask of you
Please look out for me
When I'm losing all my faith
Time won't take your place
I'll keep my loyalties
You're the reason that I breathe
As I cling to misery

I keep going through the phases
Put more feelings in their places
For now I feel the grief
As I sort through memories

The thought has just sunk in
You've been gone a year, my friend

You were the one that made me strong
You taught me how to carry on
I'll ask of you

Please look out for me
When I'm losing all my faith
Time won't take your place
I'll keep my loyalties
You're the reason that I breathe
As I cling to misery

I'll carry on as I look to you, I'll hide

I can't believe you're gone
But I won't say goodbye
The footprints that you left
Still walk along my side

At times like these
I would turn to you
We carry on
The stages we go through
And now you're gone
But I still turn to you
To carry on
The stages that you helped me through

Please look out for me

When I'm losing all my faith
Time won't take your place
I'll give my loyalties
You're the reason that I breathe
As I cling to misery

I'll carry on
As I cling to misery
