

## Another Pill

Cold

You're all the same, you lose, you win  
Your mystery hides all your feelings  
You're on your way to medicate  
No one to hold, no one to sing

Take another pill for love, let it open  
Up your mind to  
Be free again  
Think of everyone you've lost, let them  
Open up your heart to  
Complete yourself

You're all alone with broken wings  
Your life hinges on your direction  
Look to the stars to medicate  
Listen to hear the whole world sing

The world to hold, the world to sing live again
