

Better Human

Cold

Remember when we had a chance
Along the way we lost it all
Carry on
The world is gone
Our flags will raise
A loveless game

We're gonna start a war
Stand up now and be a better broken human being
Can't take this anymore
Stand up now and be a better broken human being

Remember when
We had a chance
Along the way
We lost it all
Holding on to guns and gods
The black parade
Murder one

We're gonna start a war
Stand up now and be a better broken human being
Can't take this anymore
Stand up now and be a better broken human being

Let's all come together
Lets all stand together

We're gonna start a war
Stand up now and be a better broken human being
Can't take this anymore
Stand up now and be a better broken human being
