

# Came All The Way

Cold

Why can't we save the future  
Are we too blind to see  
What makes us think of failure  
We can't believe

I can't control the motions  
Caught by conspiracy  
I traveled far for no one  
I can't believe

I came all the way today for nothing  
All the way  
I came all the way today for nothing  
All the way

I'll make a promise to break  
My wicked tragedies  
I'll try to save the pieces  
And build a dream

I'll carry on forever  
Until I can not be  
I've traveled far for no one  
I can't believe

I came all the way today for nothing  
All the way  
I came all the way today for nothing  
All the way

I came all the way today for nothing  
All the way  
I came all the way today for nothing  
All the way

All the way, all the way, all the way, all the w-a-a-y-y.....
