

Quiet Now

Cold

On the day you went away from me
I remember all the little things
When you held my hand and said I'll be OK
I can still feel you in everything
Every movie, every song they play, every time I hear your name
I pray
The rain

It's a little too quiet now
And it's harder everyday
I'll stand in the storm till the world is gone to keep you in my dreams
It's a little too quiet now
And no time can heal this pain
I'll stand up to god like I'm super man to keep you close to me
It's a little too quiet

I can still feel you in everything, every night brings back the memories
When I close my eyes you wave goodbye to me

It's a little too quiet now
And it's harder everyday
I'll stand in the storm till the world is gone to keep you in my dreams
It's a little too quiet now
And no time can heal this pain
I'll stand up to god like I'm super man to keep you close to me
It's a little too quiet

It's a little too quiet now
And it's harder everyday
I'll stand in the storm till the world is gone to keep you in my dreams
It's a little too quiet now
And no time can heal this pain
I'll stand up to god like I'm super man to keep you close to me
It's a little too quiet

It's a little too quiet
It's a little too quiet
It's a little too quiet...
