Feeling like we're worlds away Won't be long Distance only separates Same old song

On my way home Saddest thing she said On the night when she went away from me

On my way home Saddest thing she said On the night when she went away from me

Every time you went away I always knew Feels like murder one today Sad but true

On my way home Saddest thing she said On the night when she went away from me

On my way home Saddest thing she said On the night when she went away from me

You'll never make me whole You'll never make me change You'll never make me sing You'll never feel the same You'll never feel the same

On my way home Saddest thing she said On the night when she went away from me

On my way home Saddest thing she said On the night when she went away from me
