

The One That Got Away

Cold

What you said was a lie
I can't sing this away hoping memories fade
Every move Girl's on fire
I won't say anything til it all burns away

Now here comes the rain
On a winters day
She won't ever change
She's the one that got away

Now here comes the rain
On a winters day
She won't ever change
She's the one that got away

What you've killed is still alive
Though you broke everything pulled the bones out of me
You don't feel You just hide
Every word that you say aimed to blow me away

Now here comes the rain
On a winters day
She won't ever change
She's the one that got away

Now here comes the rain
On a winters day
She won't ever change
She's the one that got away

Now here comes the rain
On a winters day
She won't ever change
She's the one that got away

Now here comes the rain
On a winters day
She won't ever change
She's the one that got away...
