

Wish I Was Here

Coldplay

It's been a night
Such a night
Such a long night
Watch myself disappear
Into the wild side
Said good bye to hard side
Sang, saw a jackal appear

Every road, that's wrong
Seems like the road, I'm on
Every sign just seems unclear
Won't you come switch me on
Don't know where I've gone
And I, I wish I was here

In a fight, such a fight
You love our fight
I'm not lying, this I swear
(The demons that hide inside
To the wild, why am I tired
How come I'm never there)

Every road, that's wrong
Seems like the road, I'm on
Every sign just seems unclear
Won't you come switch me on
Don't know where I've gone
And I, I wish I was here

And I, I wish I was here
And I, I wish I was here
