

Rabbit Hole

coldrain

I'm back at it again
Trapped in a cycle
My confusion turning into rage
Tangled and torn as I dance for you
Gradually I decay

Bitter on my tongue (Bitter on my tongue)
Underneath my skin (Underneath my skin)
You're a rabbit hole
I should never go
Down down down

All that I wanted was a god damn friend
But you needed more from me
Really should know by now
Where this tunnel ends
As I go down down down
Still I go down down again

For years and years
I tried to repair
The rips the tears
This heart in despair
Will stay forever stained
FUCK

Bitter on my tongue (Bitter on my tongue)
Underneath my skin (Underneath my skin)
You're a rabbit hole
I should never go
Down down down

All that I wanted was a god damn friend
But you needed more from me
Really should know by now
Where this tunnel ends
As I go down down down
Still I go down down

I think I need some help
Somebody, anybody
If you're listening
Get me out of here

All that I wanted was a god damn friend
All that you needed was everything
All that I wanted was a god damn friend
But you needed more from me
Really should know by now
Where this tunnel ends
As I go down down down
As I go down down down
Still I go down down again
FUCK
