

My First Radio

Cole Swindell

Baby why you acting so surprised
Looking at me like I just read your mind
Well girl I know what you wanna hear
and what goes good with kisses and cold beer
You're smiling at me like you're ready to rock this
Well I got this...

This ain't my first radio
No this ain't my first turn it up,
burn it up under the moon
small town, ride around arm around you
Girl you know I know, which one will get you
singing along with your hand out the window,
slow it down dance on the side of a dirt road
uh oh where did the night go don't you know
this ain't my first radio

Yea I know when to keep it down low and
when to turn it to ten
and when you're smiling like that you know
I gotta play it again
This one right here is gonna get you closer
head on my shoulder before it's even over
I got an all night sound track, you just kick back
baby this ain't my first radio

No this ain't my first turn it up,
burn it up under the moon
small town, ride around arm around you
Girl you know I know, which one will get you
singing along with your hand out the window,
slow it down dance on the side of a dirt road
uh oh where did the night go don't you know
this ain't my first night

with you out hear like this
parked in the window stained sunrise kiss
me being the DJ, you being all mine and
I damn sure hope it ain't the last time

(No girl it won't be the last time)
this ain't my first radio

No this ain't my first turn it up,
burn it up under the moon
small town, ride around arm around you
Girl you know I know, which one will get you
singing along with your hand out the window,
slow it down dance on the side of a dirt road
uh oh where did the night go don't you know
this ain't my first radio
