

Love Is Blind

Coleman Hell

It was on a Friday when I seen your face
You we're looking over my way, stopped me in my place
I ain't superstitious, but that's been known to change
When you're standing right beside me
Oh, this must be fate

It's not what you see
I just hope that you believe
In the love that we could be
Darling, you we're meant for me

If love is blind, then close your eyes
And touch my body
Don't wanna see nobody else tonight

It was on a Sunday when I lost my faith
Always thought that you'd come one day
Gave up time to wait
I ain't superstitious, but that's been known to change
When you're standing right beside me
Oh, this must be fate

It's not what you see
I just hope that you believe
In the love that we could be
Darling, you we're meant for me

If love is blind, then close your eyes
And touch my body
Don't wanna see nobody else tonight

If love, love

If love is blind, then close your eyes
And touch my body
Don't wanna see nobody else tonight
If love is blind, then close your eyes
And touch my body
Don't wanna see nobody else tonight
