

mixtape

Coleman Hell

The only song I wanna play
Is written in your DNA
You crown the songs, amusing notes
The sound they make is beautiful

There is a melody inside your chemistry
It's like a symphony, your body sings to me
Hope you don't think of me as some mistake
'Cause I still listen to our mixtape

From your left brain to your right brain
From the [?]
Mix the IVs [?]
Flip it over, baby, love me again

There is a melody inside your chemistry
It's like a symphony, your body sings to me
Hope you don't think of me as some mistake
'Cause I still listen to our mixtape

When I put it in my tape deck it
Sounds like a train wreck now
I'll take a rain check from
All of the pain thoughts
'Cause when I reminisce
Fills like a record skips
I, I remember it
I, I, I, I remember it

Stuck in a memory
I fell in L-O-V-E
Bring your cemetery
Your body sings to me
Hope that you think of me
When you hit play
Do you still listen to our mixtape?

Listen to our mixtape
Do you still listen to our mixtape?
